FRIDAY MORNING, JUNE 28 18 1.

Toe Moderause of the Hoversment. Meen fault has been found with the Government because it has not wished with deserved severity, nor even properly restrained, the spice and traitors with which the capital and the whole scene of military operations is infestedand to illustrate its extre ce moteration, instances are given of the most bar arous treatment of unoffeading Union men by the rebal lauters. Our natural impatience with this timid indecision and lax ty may, however, be mollified somewhat by rememberin, the legal weakness of our Executive, and by anticipating the application which is undoubte ly to be made to Congress for greatly enlarged power

and discretion in dealing with treason. It should also be remembered that an esta listed government, acting not only under constitutional and logal restrictions, but charged with a sort of parental care of all who owe it obedience, whether rebel ions or loyal, cann't emulate the barbarous and arbitrary practices that naturally grow on: of rebillion. The rebels may commit every kind of ourrage with out inconsistency or less of reputation, but the Government must preserve its character. In presence of an observing Christian world, we must act consistently with our character as a liberty loving, Christian people. Our cause is just, and we can afford to be patient.

Tafe Isenrance a Day.

Doctor FRANKIAN never said a wlear thing than this :- "A p list o' Life lasurance is the best and safest provision which a man can make for his fam ly " Property, the accumulation, perhaps, o years of toil and economy. may be swept away to a day, by commercial disaster or an imp use at speculation. Houses and land are yours to ay ; to morrow they may be sold to pay your incebtedness, and soen your family may be left, by your costh, doendent upon their own unaided efforts, and the cold cherties of a seitish world But a policy of life insurance secures to your wife and children the amount for which it was issued and provides, to that extent, for their comfort and support after your decrase. No execution con touch it; nothing can depar your family from its tenefit. Is not Life lasurance a dury? If so, why delay?

Letters of San Volunteers.

On board Steamer Philad-lphia, \ WARHINGTON, Jane 24 1861. DEAR SIR:—It is some time since I have had anything of interest to record from this quarter, but will now give you an account of our last trip to Fort Monroe. On Fritay afternoon last, we took aboard about 500 abalished the greater part being 9 and 10 inch, and the balance 32 pounder, a lot of canister, a 12 pounder rified howitzer, 50 barrels of powder and 6 wagous. The day was quite hot, and the shell not very light—the 9 inch weighing near 100 lb. each; but we worked with w will, making the sweat coze out of every pore, and in a few hours our task was fin shed. We left the Navy Tard at I P. M. Our first stopping place was off Aquia Creek, where we came alongside of the Pawnee, and put the large shell and powder aboard: this dene, we continued our trip do wn the river. About five o'clock, next moraing, we saw a small pleasure boat drifting in the stream; a boat's crew was sent after her, nothing was found aboard but a jug—not of whiskey, as might have been, but of water: a line was made fast, and she was DEAR SIR :- It is some time since I have of water : a line was made fast, and she was roon towing astern.

After a pleasant sail we reached the fort about 3 P. M. Our officers immediately boarded the Cumberland and Minnesota, and en their return we commenced to land our eargo on the dock. This done, we thought that we cond very prefitably employ the little time we bad to spare before saiding, by hauling a seine which lay idly upon the beach. It was soon in the water, at d af er half an hour's work we lazded hundreds of hvely fish upon the san' a half a barrel had been secured when we heard the whitele of our boat and hurried aboard. having the rest for the soldiers of the fort. Next morning we had an agreeable addition to our mess, which is not general y everblest with variety. At curk we started for Washington. toking as passen, ers two sieves-man and wife They had he d on a tlantation a few miles back from the firt, with a hondred others: their master bad gone off, and they, fullowing his example, took French leave and entered thfart. Gen. BUILER sent them to Mr. Came non as house servants. In the early part of the morning we took a aloop with a load of fish in tow, the wind being very light and they fearing the releals, who have an uop'easant habit of boarding these craft, when becalmed, and seizing, or burning them, as they did with the schooner from Amboy, N. J., a for nights

eince. About 9 o'clock we reached the Pawnee and took off a lot of powder-kegs, and over 800 supty boxes which had contained the abelithrown in the engagement off Aquia creek.—Our men went about the steamer, and I had an opportunity to glean a few items of interest. There is a ecester from the Aquia creek camp on board; in conversation with him I learned that his name is JOHN DOWOLEG, from Fall River, Mass, a carpenter by trade. He has been living in Montgomery County, Ala. Fearing that he would be presed into the secession army, he attempted to leave the South. After many difficulties he reached Richmond, and being out of money he worked on the building intended for the Congress of the C.S. A., for which he got no pay a deling suspected and watched, was forced to join a Rifle Company which was sent to Aquis creek. Watching his opportunity one night, he took to the river and attempted to swin to the Pawnes, was seen and fixed upon, but exceptly the tide running very strong carried him a long distance down the river, but he susceed in reaching the Maryland shore, waiting till morning be took to the water again, was seen from the Pawnes and taken aboard. He states that the troops at Rephmond are poorly provided for, taat no mone. empty boxes which had contained the shell was seen from the Pawnee and taken award. He states that the troops at Beehmond are poorly provided for, teat no impay over than shinplasters is in circulation, and that everything is dear. There has been a great deal of sickness among the troops at aquia Creek. They have a terrible barred and lear for the Pawnee, whose sooning parties are out every big. It do not be not much mitching by destroying their boats and stores. Sa urday night they burned a storehouse about twelve miles above the creek.
